STAFFORD CUSTOM MANUFACTURING VIDEO HIGHLIGHTS MECHANICAL DESIGN PROBLEM SOLVING CAPABILITIES

A new video that provides an overview of their manufacturing capabilities for producing custom special purpose shaft collars, couplings, and mounts is being introduced by Stafford Manufacturing Corp. of Wilmington, MA.

The Stafford Custom Manufactured Shaft Collars, Couplings & Mounts Video provides an overview of the modifications that can be made to parts for adding functionality including special materials and machined features. Highlighted are the Accu-Clamp™ Collar which combines a non-marring clamp with a flat perpendicular face and the Accu-Flange™ precision mount.

Illustrating how multiple mechanical components can be designed into a single part, the Stafford Custom Video shows design engineers what can be achieved by modifying standard parts, adding surface treatments, slots, and more. These special parts can include stops, spacers, clamps, actuators, and mounting devices. Materials and sizes can match the application.

The Stafford Custom Manufactured Shaft Collars, Couplings & Mounts Video Can be viewed at <https://www.staffordmfg.com/stafford-video.html>
