## FOR IMMEDIATE RELEASE

### RIGID SHAFT COUPLINGS CUSTOMIZED FROM STANDARD TEMPLATES

A new standard line of rigid shaft couplings offered with a choice of popular design templates to let users reduce the cost and delivery time of small quantity custom orders has been introduced by Stafford Manufacturing Corp. of Wilmington, Massachusetts.

Stafford Customizable Shaft Couplings let users specify their own custom rigid couplings from 7 standard blank sizes for shafts from 3/8" to 2" O.D. and a series of standard design templates. They include one- and two-piece configurations with or without keyways, and straight-through or stepped bores manufactured from aluminum, steel, and stainless steel.

Available in small quantities, even one-piece, Stafford Customizable Shaft Couplings enable machinery, equipment, and conveyor builders to avoid the cost and longer lead times associated with custom designed parts. These parts are ideal for prototyping and repairs.

Stafford Customizable Shaft Couplings are priced according to configuration and quantity. Specifics are provided at the company's website.
