FOR IMMEDIATE RELEASE

FLANGE MOUNTING SHAFT COLLARS CUSTOMIZABLE IN PRODUCTION QUANTITIES

A full line of customizable flange shaft collars that incorporate an integral clamp, maintain their perpendicularity, and are easy to adjust has been introduced by Stafford Manufacturing Corp. of Wilmington, MA.

Stafford Customizable Accu-Flange™ Shaft Collars feature a machinable flange that provides OEMs and end-users with the ability to design custom hole patterns and mounting surfaces. Easy to customize these high-strength, non-marring flange mounting collars, website visitors can download a CAD drawing of the part they want to modify, revise it to match their own needs, return it, and request a quote for production quantities.

Available in steel, stainless steel, and aluminum, Stafford Customizable Accu-Flange™ Shaft Collars are developed from a 100 part standard product line which includes a keyway and comes in sizes from 1/4" x 1.48" to 3" x 6.335". Designers can rapidly develop a custom solution and then order parts machined to specification in their desired quantities.

Stafford Customizable Accu-Flange™ Shaft Collars are priced depending upon material, size and quantity with delivery from stock.
