

## COMPLIANCE REQUIREMENTS

### Registration, Evaluation, and Authorization of Chemicals (REACH)

REACH (Registration, Evaluation, Authorization and Restriction of Chemicals) is a European Union Regulation (EC 1907/2006) on chemicals and their safe use and entered into effect June 1, 2007. The directive governs the production, use and importation of chemical substances.

Suppliers of articles must provide recipients with information on Substances of Very High Concern (SVHC) if those are present above a concentration limit of 0.1% on an article level. Stafford Manufacturing Corp. products do not contain any of the currently listed SVHC's. Registration of articles manufactured and supplied by Stafford is not required.

As the regulations of REACH evolve, Stafford will continue to monitor new requirements and to take appropriate actions if needed.
