

## COMPLIANCE REQUIREMENTS

### Restriction of Hazardous Substances Directive (RoHS)

The Restriction of Hazardous Substances Directive (RoHS) was first adopted by the European Union in 2003 to restrict the use of six hazardous materials in the manufacture of various types of electronic and electrical equipment. A product is determined to be compliant if levels of the material used in its components are at or below the acceptable limits.

RoHS2 (2011/65/EU) is the current version of the directive and was updated in 2015 to include four additional substances.

All catalog products sold by Stafford meet the requirements of RoHS2.
